

## SPARES

Green's supplies a wide range of spares for marine and land boilers, burners and associated equipment. Regardless of the boiler make or model you have, we can source the spares you need.

Our dedicated team of technical sales engineers provides professional quotations, usually within 24 hours and offer a variety of delivery options to meet your requirements. Many items can be dispatched immediately from our comprehensive stocks or from our preferred suppliers around the world.

Spares we supply include:

### Boiler water levels:

- Gauge glasses
- Gauge cocks
- Manifolds
- Floats
- Float chambers
- Probes
- Modulating feed valves
- Cones, packing, sleeves and gaskets
- Controllers

### Burner parts:

- Electrodes
- Flame scanners
- Oil nozzles
- Air pressure switches
- Ignition transformers
- Gasket sets
- O-ring sets
- Gas valves
- Hoses
- Oil pumps
- Fans and impellers
- Solenoid valves
- Micro switches

### Valves and boiler mountings:

- Safety valves
- Blowdown valves: auto and manual
- Check valves
- Feed angle valves
- Main and secondary isolation valves
- Sample cooler
- Boiler and hand-hole doors
- Boiler pressure gauge
- Inspection ports

### Other spares:

- Gaskets, joints and packing
- Control and automation
- Refractory: mouldable and castable
- Ceramic blankets
- Boiler tube cleaning equipment
- Flexible bellows
- Blowdown vessels
- Boiler tubes: H-fin, spiral fin and plain
- Headers and other pressure parts
- Pumps
- Trace heating and oil heaters
- Meters – steam, water and fuel

Green's supplies spares globally to more than 450 marine and land-based customers including BASF, British Sugar, Engie, McCain Foods, Solvay Intertox, The NHS, Carnival Cruises, Princess Cruises, Hapag-Lloyd, Kuwait Oil Tanker Company, Bernard Schulte Shipmanagement, Oldendorff Carriers and Northern Marine Management.

Green's is a world leader in the design and manufacture of economisers and waste heat recovery systems. Our founder Edward Green patented the first fuel economiser in 1845. Since then, we have been combining innovation and engineering expertise to help companies around the world reduce emissions, improve efficiency and save money.

Today, from manufacturing and support sites in the UK, Green's is recognised for its superlative products and collaborative approach to design and manufacture. Our main markets are energy (biomass, waste to energy and conventional fuels), industrial and marine.

We also support our customers with aftermarket services that ensure their boiler and waste heat recovery systems are kept operational at optimum efficiency.
