Damen Shiprepair, Carnival (P&O Cruises), John Samonas, NLNG Ship Management, Costa Cruises, Total, Kuwait Oil Tanker Company (KOTC), Irish Ferries, Northern Marine Management, V-Ships and Hapag Lloyd.

Green's is a world leader in the design and manufacture boiler equipment. Our founder Edward Green patented the first fuel economiser in 1845. Since then, we have been combining innovation and engineering expertise to help companies around the world reduce emissions, improve efficiency and save money.

Today, from manufacturing and support sites in the UK, Green's is recognised for its superlative products and collaborative approach to design and manufacture. Our main markets are energy (biomass, energy from waste and conventional fuels), industrial and marine.

We also support our customers with services that ensure their boiler and waste heat recovery systems are kept operational at optimum efficiency.
